

§ 69.205

(b) For a multi-hull vessel, the horizontal distance between the outboard side of the foremost part of the stem of the foremost hull and the outboard side of the aftermost part of the stern of the aftermost hull, excluding fittings or attachments.

Vessel designed for sailing means a vessel which has the fine lines of a sailing craft and is capable of being propelled by sail, whether or not the vessel is equipped with an auxiliary motor, a decorative sail, or a sail designed only to steady the vessel.

[CGD 87-015b, 54 FR 37657, Sept. 12, 1989; 54 FR 40240, Sept. 29, 1989; USCG-1999-6216, 64 FR 53225, Oct. 1, 1999]

§ 69.205 Application for measurement services.

To apply for measurement under the Simplified Measurement System, the owner of the vessel must complete either an Application for Simplified Measurement (form CG-5397), or a Builder's Certification and First Transfer of Title (form CG-1261) which has the information in Part III "Dimensions" completed, and submit it to the National Vessel Documentation Center.

[CGD 95-014, 60 FR 31606, June 15, 1995]

§ 69.207 Measurements.

(a) All lengths and depths must be measured in a vertical plane at centerline and breadths must be measured in a line at right angles to that plane. All dimensions must be expressed in feet and inches to the nearest half inch or in feet and tenths of a foot to the nearest .05 of a foot.

(b) For a multi-hull vessel, each hull must be measured separately for overall length, breadth, and depth and the vessel as a whole must be measured for registered length, breadth, and depth.

46 CFR Ch. I (10-1-09 Edition)

(c) The Coast Guard may verify dimensions of vessels measured under this subpart.

§ 69.209 Calculation of tonnages.

(a) *Gross tonnage*. (1) Except as in paragraphs (a)(2) through (a)(5) of this section, the gross tonnage of a vessel designed for sailing is one-half of the product of its overall length, overall breadth, and overall depth (LBD) divided by one hundred (i.e., 0.50 LBD/100), and the gross tonnage of a vessel not designed for sailing is 0.67 LBD/100.

(2) The gross tonnage of a vessel with a hull that approximates in shape a rectangular geometric solid (barge-shape) is 0.84 LBD/100.

(3) The gross tonnage of a multi-hull vessel is the sum of all the hulls as calculated under this section.

(4) If the volume of the principal deck structure of a vessel is as large as, or larger than, the volume of the vessel's hull, the volume of the principal deck structure in tons of 100 cubic feet is added to the tonnage of the hull to establish the vessel's gross tonnage. The volume of the principal deck structure of a vessel is determined by the product of its average dimensions.

(5) If the overall depth of a vessel designed for sailing includes the keel, only 75 percent of that depth is used for gross tonnage calculations.

(b) *Net tonnage*. (1) For a vessel having propelling machinery in its hull—

(i) The net tonnage is 90 percent of its gross tonnage, if it is a vessel designed for sailing; or

(ii) The net tonnage is 80 percent of its gross tonnage, if it is not a vessel designed for sailing.

(2) For a vessel having no propelling machinery in its hull, the net tonnage is the same as its gross tonnage.

[CGD 87-015b, 54 FR 37657, Sept. 12, 1989, as amended by CGD 97-057, 62 FR 51045, Sept. 30, 1997]

INDEX

SUBCHAPTER G—DOCUMENTATION AND MEASUREMENT OF VESSELS

EDITORIAL NOTE: This listing is provided for informational purposes only. It is compiled and kept current by the U.S. Coast Guard, Department of Homeland Security. This index is updated as of October 1, 2009.

Part, subpart, or section

A

Abstracts of Title, and Certificate of Ownership	Subpart T
Abstract of Title, issuance of	67.301
Acceptable Title Evidence; Waiver	Subpart E
Alteration of Certificate of Documentation	67.311
Appendix A - Oath for Qualification of Corporation as a Citizen of the United States Under the Act of Sept. 2, 1958 (46 U.S.C. 883-1)	68
Appendix A - Oath for Qualification of a Not-For-Profit Oil Spill Re- sponse Cooperative	68
Appendix B - Oath for Documentation of Vessels for Use By a Not-For- Profit Oil Spill Response Cooperative	68
Appendix B - Oath of Parent or Subsidiary Corporation Act of Sept. 2, 1958 (46 U.S.C. 883-1)	68
Applicability	67.352, 69.3
Application by an 883-1 corporation to document a vessel	68.19
Application for Documentation, Exchange or Replacement of Certificate of Documentation, or Return to Documentation: Mortgagee Consent; Validation	Subpart K
Application for foreign rebuilding determination	67.177
Application for measurement services	69.17, 69.55, 69.105, 69.159, 69.205
Application for new vessel determination	67.175
Application for Special Qualifications for Vessel Documentation	Subpart J
Application of other laws	69.153
Application procedures; all cases	67.141
Application to document a vessel	68.35
Assignment of official number	67.111
Assignments and Designations Required for Vessel Documentation	Subpart H
Association or joint venture	67.37
Authorized measurement organizations	69.15

B

Between-deck tonnage	69.111, 69.165
Build Requirements for Vessel Documentation	Subpart F

C

Calculation of tonnages	69.209
Calculation of volumes	69.65
Cancellation; requirement and procedure	67.173
Captured vessels	67.134
Certification of markings	69.179
Certificate of Ownership, issuance of	67.303
